

# 15% OFF FALL PROMO

**15% OFF**

All orders of Turf Shield Arctic placed and shipped by November 30th, 2019

The dual-layer Turf ShieldArctic System begins with our standard Turf Shield Cover woven from durable, translucent polyethylene. This top layer creates a thin, protective layer that acts as a small greenhouse, allowing the turf to breathe and retain its moisture while letting sunlight through. The Turf Shield Arctic Layer provides an additional air-flow layer which increases thermal performance and protection for areas with more extreme winter weather.

If you remember last winter, it makes sense to get prepared and take advantage of our seasonal offer.

IVI-GOLF 5 Pine Camp Dr. Binghamton, NY 13904 888.970-5111

## 2019 Fall Promo - 15% OFF

All orders are custom fabricated, with no standard sizes available. Order processing schedules are typically performed on a prompt basis, with little lead time required. Check with IVI-GOLF Customer Service when placing orders for approximate lead times.

### ORDER PROCESSING GUIDELINES

The 2019 Turf Shield Arctic Promo allows for a discounted rate of 15% off for the bundled, two-layer Arctic System only. This discount does not apply to the Standard Turf Shield Cover when ordered independently.

Product upgrades such as edge reinforcement webbing, customized grommeting, fasteners, or other features are not included. Freight costs are not discounted.

All orders must be received by November 30th, 2019. Order turnaround will vary and will need to be confirmed by our Customer Service Department. Turnaround times will also be effected by any credit establishment process. Credit card payments or advance payments are required if credit is not established.

### FABRICATION - DUAL-LAYER TURF SHIELD ARCTIC SYSTEM

**Upper Layer - Standard Turf Shield Cover** - is manufactured with double-sewn, reinforced edges and seams. Around the perimeter, grommets are placed at corners and spaced every 5' for securing to the ground.

Covers are shipped in a folded manner and placed in a standard storage bag. An ID tag will be sewn into one of the corners of the cover with product identification, dimensions, and hole identification.

Depending on the cover dimensions, interior double-reinforced seams will be every 10', 12' or 15'. There is no need for grommets on the interior of the cover as the standard perimeter grommet spacing is sufficient to secure.

**Lower Layer - Turf Shield Arctic "Air-Flow" Layer** - A non-woven polyester matrix with a non-soluble binder manufactured in rolls 90" wide and 90' in length, 675 sq. ft. area.

The two materials are manufactured and fabricated separately. The Arctic "Air-Flow" Layer is not sewn into the standard Turf Shield Cover. Each layer is packaged separately and identified accordingly.

### CALCULATING REQUIREMENTS - TURF SHIELD ARCTIC SYSTEM

For the custom fabrication of the Standard Turf Shield Upper Layer, customer will need to provide a unique identifier for each area to be covered (for golf courses - typically a hole number and green/tee identifier) and a length and width dimension.

For the Turf Shield Arctic Layer, the area calculations are determined based on the total number of cover dimensions, divided by the area per roll (675 square feet). Total number of rolls required will be rounded upwards should the total area required fall between roll area.

Our Calculation Sheet is available and provided as a PDF Form for easy data-entry.

## 2019 Fall Promo - 15% OFF

### CREDIT APPLICATION PROCESS

For customers requesting the establishment of credit, a credit application can be provided by our Customer Service Department. Once complete and submitted to IVI-GOLF, the process typically takes 1-2 days.

Should contact with any trade or bank references be difficult, additional time will be required. Once approved for credit, the order processing commences. If payments are in advance or on a credit card, order processing commences once payment is complete.

### HOW TO ORDER

Customers can contact IVI-GOLF in several ways:

1. Customer Service toll-free at 888-970-5111
2. Customer Service Email at [customerservice@ivi-golf.com](mailto:customerservice@ivi-golf.com)
3. Fall Promo Contact Form at [ivi-golf.com/covers15off](http://ivi-golf.com/covers15off)

Should you have any questions, we'll be glad to assist in pricing information, measurement assembly, applying for credit, and processing timeframes.

### SHIPPING

All shipping is typically handled with a common carrier on a LTL basis. Freight quotes will be provided during order processing. Costs for freight are not included in this 2019 Fall Promotion.

### 7 YEAR PRO-RATED WARRANTY

All our Turf Shield and Turd Shield Arctic Systems are covered with a 7 year limited warranty.

### IVI-GOLF AND OUR EXPERIENCE WITH COVERS & TARPS

IVI-GOLF (a division of Indian Valley Industries, Inc.) has commonly been synonymous with the Sandtrapper name and product line begun in 1997. Yet prior to the Sandtrapper launch, we've been in the business of manufacturing turf covers, containment tarps, and protection screens for almost 50 years.

Founded in 1940, Indian Valley Industries, Inc. is a vertically integrated supplier to American Industry, including environmental protection products and supplies to the heavy construction and oil/gas industries. We continually apply the same synergies of product, service and support to the Golf Division as we've used company-wide since the beginning..
